DETAILED ACTION

Remark

- This Office Action is in response to applicant's amendment filed on August 3, 2005 which has been entered into the file.
- By this amendment, the applicant has canceled claims 1-33 and has newly added claims 34 to 48.
- Claims 34 to 48 remain pending in this application.

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

(A). a digital micro-mirror device with a 3D encoder system integrated with a color wheel having a first 3D encoder sub-system with no active rotator, ("optionally" means no needed),

(B). a digital micro-mirror device with a 3D encoder system integrated with a color wheel having a first 3D encoder sub-system, comprises circular polarizing color filters, and a second 3D encoder sub-system including passive quarter wave plate,

(C). a digital micro-mirror device with a 3D encoder system integrated with a color wheel having a first 3D encoder sub-system, a linear polarizer in the light path from lamp, and a second 3D encoder sub-system including active rotator,

(D). a digital micro-mirror device with a 3D encoder system integrated with a color wheel having a first 3D encoder sub-system, a circular polarizer in the light path from lamp, and a second 3D encoder sub-system including active rotator and a quarter wave plate,

(E). a digital micro-mirror device with a 3D encoder system including polarizing device and an active rotator.

Art Unit: 2872

(Since the dependence of the claims is massed up, so no identification of claims in accordance with the listed species is possible).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. A telephone call was not made to applicant's attorney to request an oral election to the above restriction requirement, due the complication of the restriction requirement.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named

Art Unit: 2872

inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Audrey Y. Chang whose telephone number is 571-272-2309. The examiner can normally be reached on Monday-Friday (8:00-4:30), alternative Mondays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Drew Dunn can be reached on 571-272-2312. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
